Press release

Spiko and Amundi introduce SAFO, a new tokenized fund for global treasury and collateral management

Paris, 19 March 2026 - Amundi and Spiko, a leading European fund tokenization platform[1], announce the launch of the **Spiko Amundi Overnight Swap Fund (SAFO)**.

SAFO is a tokenised sub-fund of SPIKO SICAV, a SICAV regulated under French law, designed to meet the treasury and collateral needs of corporates and financial institutions of all sizes, offering a cash-equivalent instrument with 24/7 transferability.

Key features of the fund include:

- **Use of fully collateralized total return swaps** with top-tier banks, to deliver stable yields above risk-free benchmarks, while maintaining overnight liquidity.
- **Availability in four currencies**, allowing investors to subscribe and redeem from as little as 1 EUR, USD, GBP, or CHF.
- **Blockchain-enabled efficiency**, providing near-instant settlement, flexible custody options, real-time transparency of the shareholder register, and 24/7 borderless transferability of fund shares.
- **Programmatic access** via API or smart contracts.

Amundi serves as SAFO's delegated investment manager, with CACEIS acting as depositary bank and fund administrator. Spiko acts as transfer agent, tokenization platform, and broker for the fund shares. The shareholder register is hosted on Ethereum and Stellar, with the ability to expand to additional networks in response to investor demand. Chainlink provides the oracle infrastructure to record SAFO's NAV on-chain.

SAFO is currently available to eligible investors through Spiko, with plans to broaden access via Spiko's API-enabled distribution network.

Jean-Jacques Barbéris, Head of Institutional and Corporate Clients, and ESG at Amundi said: "SAFO provides professional investors with a fast and transparent access to cash management solutions. This initiative is part of our ambition to contribute to the rise of tokenized solutions."

Paul-Adrien Hyppolite, **co-founder and CEO of Spiko,** added: "Clients will benefit from the reliability of Spiko's fund issuance and distribution infrastructure."
